

## **NEW SPORTS PAD FACTS**

The New Sports Pad will be a basic facility carrying on the tradition of the Buckhorn Outdoor Rink. Our preferred option would have an enclosed building at one end and a larger outdoor artificial ice surface.

It would be funded primarily by donations, grants, advertising and ice rental income.

It is intended to complement the programming and activities of other community centre & hall facilities and is supported by the Parks, Recreation & Culture Advisory Committee 'Say How You Play' survey results.

The New Sports Pad will provide more recreation, more reliability, more services and supports the Trent Lakes strategic priority theme of Active, Healthy Living.

You can learn more in the New Sports Pad feasibility study which includes various options and detail. The study will be published in the Parks, Recreation & Culture Advisory Committee 'Interim Master Plan' and will appear as a Committee Report/Delegation in the Agenda of the November 17, 2020 Council meeting.
